Our History

Who We Are

The vision behind IPI dates back to 1954 when it was conceived by Dr. Labib Rashid Mirza, in collaboration with a committed group of pharmacists, specialists, and investors.

We are a renowned pharmaceutical company, developing and producing top-tier medications distributed locally and globally. Our aim is to provide the finest healthcare solutions to enhance patients' lives and create a brighter tomorrow.

With a strong commitment to cancer treatment, the company has risen to prominence as a key player in Iraq's pharmaceutical landscape.

Our Roots

IPI is an established Iraqi pharmaceutical company with a rich history dating back to 1954. We have always been dedicated to providing valuable treatments to enhance the lives and well-being of our patients.

Our journey began with a collaborative agreement with the esteemed Belgian company U.C.B., which meticulously designed the factory to adhere to international industry standards.

The factory was constructed in Baghdad on a land area of 4,900 square meters, featuring a reinforced concrete structure covering 3,500 square meters.

Despite encountering various challenges along the way, our dedicated team and partners worked relentlessly to overcome these obstacles. This collective effort culminated in the successful opening of the factory in 1957-1958, graced by the patronage of King Faisal II.

Mission & Vision

IPI is a pharmaceutical company dedicated to saving lives through the production of high-quality ingredients using innovative solutions. We are committed to preserving health and optimizing resources to provide cost-effective solutions at competitive prices. We partner with international companies in the medical sector to advance scientific knowledge and make Iraq a leading exporter of medicine in the region.

Pharmacovigilance

World Health Organization (WHO) definition of PV:

The science and activities relating to the detection, assessment, understanding and prevention of adverse events or any other possible drug-related problems.

Key goal of pharmacovigilance & QPPV at IPI:

Quality Assurance

Certificates

Quality Policy Certificate

ISO Certificate

Class-A Certificate

Labs

At IPI, innovation and quality are at the core of everything we do. Our state-of-the-art laboratories are equipped with the latest technology and quality control equipment. The control lab serves as the heart of the factory, where all raw materials undergo thorough inspection and analysis. All manufactured products are rigorously checked and verified to ensure compliance with international standards before they are packaged and distributed.

R&D Pipeline

IPI is a leader in medical advancement, we use cutting-edge technologies, including computational biology, AI, and high-throughput screening, to identify novel drug candidates. We then use advanced in vitro and in vivo models to assess safety and efficacy, adaptive clinical trial designs and real-world evidence, to accelerate the development of promising therapies that have the potential to transform lives.

The following table provides an overview of our current research and development (R&D) pipeline products:

Product Name	Usage / Family
Labetalol HCl	High blood pressure/ beta blockers
Isosorbide dinitrate	Coronary artery disease
Montelukast sodium	Asthma medication/ leukotriene receptor antagonist (LTRA)
Topiramate	Anti-epileptic drug/ Anticonvulsant
Tenofovir alafenamide	Antiviral
Acyclovir	Antiviral
Sitagliptin	Antidiabetic
Empagliflozin	Antidiabetic
Dapagliflozin	Antidiabetic
Cana Gliflozin	Antidiabetic
Trelagliptin Succinate	Antidiabetic
Tranexamic acid	Menstruation/ Antifibrinolytics
Deferiprone	Thalassemia/ Iron chelators
Tacrolimus	Immunosuppressant
Mycophenolate sodium	Immunosuppressant
Ondanestron	Antiemetic
Sevoflurane	Anesthesia
Isoflurane	Anesthesia
Bicalutamide	Prostate Cancer
Sofosbuvir	Virus C Treatment
Daclatasvir	Virus C Treatment
Velpatasvir	Virus C Treatment
Obeticholic Acid	Virus B and Liver Disease
Azithromycin	Macrolide Antibiotics
Ciprofloxacin	Macrolide Antibiotics
Clarithromycin	Macrolide Antibiotics
Tadalafil	Erectile Dysfunction
Valsartan	Cardiovascular
Crisaborole	Eczema
Itraconazole	Anti Fungal
Amorolfine Hydrochloride	Anti Fungal
LCZ696	Heart Failure

Products may not be available in all territories due to patent restrictions.

Our Global Network

IPI is successfully partnering with international medical companies with the aim of expansion & knowledge sharing to preserve the health of our patients' lives.

We are collaborating with PRU Pharmaceutical Research Unit. PRU is One of the leading Arab Pharmaceutical Industry Consulting Co. (APIC), which has been providing clinical services for over two decades to more than a hundred pharmaceutical companies throughout Europe, Asia, Africa, and the USA.

These partnerships mark a significant step forward in our commitment to advancing healthcare solutions.

Areas of Interest of IPI

Our primary focus is on advancing global health through groundbreaking research in innovative medication discovery and the latest biotechnological breakthroughs. Our relentless dedication to enhancing the well-being of patients propels our efforts in research, innovation, rigorous R&D, and establishing global partnerships.

We believe that collaboration is essential to accelerating scientific progress, and we are always exploring new partnerships to team up with industry leaders to develop and deliver cutting-edge solutions that address the world's most pressing health challenges.

We are open to forging new alliances and warmly welcome the opportunity to explore collaborative ventures with like-minded innovators. Feel free to reach out to us.
